

Our internship is accredited through Portland State University (PSU) and is designed to optimize your benefits.

***It is important to know that earning credit carries an extra cost beyond the program fee. This fee is solely for the credit as registering for any class/credit carries a per credit cost.*** If you register through your institution, the fee will be assessed like a regular class when you register. If you register through PSU, you will submit the fee to Student-Athletes Abroad.

**There are 4 main ways to receive credit:**

-  **Register through a department at your home institution:**  
This is usually the best option. Many departments offer an internship-for-credit course which involves you working with an internship coordinator in that department. Every department handles internship credit differently, so the first important step is to reach out to your adviser within the department of your selected major or minor. You will be charged the per credit hour rate for your University/College.
-  **Register through the Study Abroad or International Education Office:**  
Some Universities/Colleges offer internship credit through the SA or IE office. If credit is not offered through a department, contact the SA or IE office.
-  **Register through Career Services:**  
Some Universities/Colleges offer internship credit through the Career Services office. If credit is not offered through any department or the Study Abroad/International Education office, contact Career Services.
-  **Register through Portland State University, our School of Record:**  
If you are struggling to find credit at your Institution, we can assist you in registering through PSU. You will still need to get the transfer of credits approved, which will involve a conversation with your academic adviser and some paperwork. The flat rate for receiving a PSU transcript is \$750. The number of credits assessed is determined by your Institution.

## Next Steps

Confirm your internship syllabus

If you register for credit through a department, study abroad, or career services at your Institution, they will either:

- 1) Require that you only complete our syllabus or
- 2) Require another syllabus or set of requirements specific to your Institution.

In the case of option 2, we will work with you and your adviser to streamline assignments and requirements so you are not doing unnecessary extra work. Most programs **grant 3 credit hours** to our Internship Course.

Dr. Marissa Floyd will also work with you throughout the process and help support you in connecting with the right offices on campus or at PSU.

**Contact Marissa at [marissa@saabroad.com](mailto:marissa@saabroad.com) with any questions.**

## Traveling abroad is possible as a student-athlete!

Let us know if there are any ways we can help  
with the credit process!
